

Delivering Value through Transformation

Arcadis-Cority Partnership

In partnership with Cority, Arcadis will help you reimagine the contribution of EHS&S to the organizational calculus by transforming your business to benefit from the new industrial revolution through digital transformation of your EHS&S program.

- Cority-preferred platinum services provider
- 100+ years of collective Cority experience on our team
- Successful projects across industries for global companies including: Food & Beverage, Oil & Gas, High Tech, Health Care, Chemicals, Electronics, Transportation, Construction, Metals, Manufacturing, and Medical Device.
- Skilled Cority global resources across North America, Europe and Asia Pacific

Arcadis and Cority have invested in curating a collaborative and highly-skilled resourced partnership because we believe that together we will help our clients optimize performance, reduce risk and effectively compete in an ever-changing marketplace.

Our common values begin with a core focus on client success, include a mutual drive to deliver impactful business outcomes, and always return to a shared belief that our work is improving quality of life and delivering leading environmental stewardship.

We consistently endeavor to explore what is possible as client needs evolve and technology improves. We leverage our clients' data and model processes in the Cority solution to optimize EHSQ and Sustainability performance by standardizing consistent, transparent and effective business practices via a common and modern technology-enabled management platform.

Cority's industry leading information technology products (as recognized by the 2020 Verdantix Green Quadrant) combined with Arcadis' capacity to deliver expert technical services globally (recognized by Verdantix as a leading provider of digital EHS&S services in 2020) can provide a confident value service and solution from which our clients can achieve tangible business outcomes and realize long-term, sustainable success.

In partnership with Cority, Arcadis effectively designs and successfully delivers enterprise EHSQ and Sustainability solutions across the organization. We invest in your team to understand your business and performance drivers, stakeholders and core operational goals to develop, design and execute a solid technology solution to meet short term needs and position you to adapt and grow, while enabling the greatest return on your investments.

Our highly-skilled EHS&S experts, management consultants and IT professionals bring rich domain expertise, a service ethos and a unique familiarity of industrial EHS&S obligations and performance. We deliver a deep range of capabilities spanning the entire asset life cycle, combined with strategic market sector insights and innovation.

The Arcadis Advantage

Success is more than just technology, Arcadis connects your vision to our global programs and responsibilities and is fully committed to being your trusted advisor to help seamlessly integrate information across your business and operations to identify symbiotic linkages to drive valuable insights at every level of your organization and continuously adapt and enhance your EHSQ and Sustainability performance and culture. This leads to risk awareness, fortified resilience and ultimately, enterprise- wise business transformation and collaboration.

350+ professionals around the world focused on solving your business information performance challenges.

20+ years of digital EHS&S service experience bringing together management consultants, technologists and subject matter experts with a global footprint.

600+ deployments for clients in the chemical, pharmaceutical, power and utility, transportation, oil and gas, consumer goods, metals and mining, retail, and public sectors throughout North America and across the globe.

Your Results

- Improved business performance
- Reduced liability and risk exposure
- Reduced operational costs
